

I enjoy listening to KLOVE daily. It helps me get through the stress in my day. My kids can listen without being concerned about inappropriate material being aired. They broadcast only quality material. This day and age needs to have uplifting programming. I believe KLOVE provides this type of programming. There is no other station in the USA that provides such programming.(that I am aware of). I believe the FCC showed use KLOVE as an example to others on what quality family programming should be like.

Thanks
